

WOOTTON & WOOTTON

TRANSMISSION & DISTRIBUTION LTD

UP TO 200KV TESTING Innovations in High Voltage Cable Testing

Wootton & Wootton have been providing cable services on a nationwide basis for over several decades. As part of our extensive testing range and expertise we'd like to introduce the HVA200 as the first company to have one in commercial use in the UK.

HVA200

- First unit in commercial use in the UK
- Sinusoidal VLF Output voltage up to 200kV (141kV rms)
- DC (+/-) voltages up to 200kV
- Partial Discharge & Tan Delta diagnostics available on request
- Smallest & lightest AC test set for cables up to 132kV in the world
- Compact design allowing easier access to test locations
- True continuous overvoltage withstand test
- PD measurements comparable to 50 Hz measurements and better sensitivity on TD measurements than 50 Hz testing

We have teams of highly skilled craftsmen, authorised for multiple REC/DNO's, executing a broad range of different services within the transmission and distribution arena. We are situated on the Shropshire Cheshire border, with easy access to the M1, M6 and M62.
